Introduction:

Following the successful production of four photography books over the past four years, the Khorasan Razavi Institute of Photographers is releasing a fifth book this year. A notable benefit of the publications by the institute is that each book includes an International Standard Book Number (ISBN) and a national identification number of books, which significantly boosts the career credentials of participating members. Furthermore, the book features high-quality photographic reproductions, complemented by a concise professional resume of each contributing artist. This bilingual publication is provided to all individuals involved in the project.

The institute is dedicated to supporting photographers from Khorasan Razavi province, especially focusing on those from smaller towns, ensuring they have equal access to specialized programs and opportunities available to other artists. In collaboration with the Ministry of Culture and Islamic Guidance of Khorasan Razavi and the Police Force of the Islamic Republic of Iran, the institute has launched a membership card initiative for its active members. These cards serve as official identification, authorizing photographers to work in urban areas throughout the province.

A primary aim of the institute is to elevate the academic and educational standards for photographers. In addition, the institute is dedicated to organizing specialized workshops aimed at advancing Iranian photography on the international stage for photography. Its primary focus is to familiarize young photography enthusiasts with the latest international techniques, inspiring them to compete with professionals worldwide and excel in global photography.

Each year, the institute organizes photography camps on diverse topics for its members, providing photographers with the opportunity to leverage the resources available in Khorasan Razavi province fully. In addition, the institute hosts a photography exhibition, with the 8th edition recently taking place in the provincial capital. The institute is committed to enhancing the technical and artistic skills of photographers in the region, operating on the principle that expanding knowledge leads to improved photographic quality. To support this, the institute offers monthly training courses, and participants receive bilingual certificates upon completion.

In January 2021, the institute applied for a permit, and by April 2021, it received official approval from the Ministry of Culture and Islamic Guidance in Khorasan Razavi. During this period, the institute also registered as a company. The fifth photo book highlights the work of photographers who have refined their skills to a high level on both national and international stages. Some of the photos featured have garnered prestigious awards at international exhibitions, further elevating the book's significance on a global scale.

With all my respect

Mahdi Zabolabbasi (EFIAP/g)
